Elinor Velasquez

1. Research Data Analyst: Word Cloud Generator: Data, Scientific, Experience, Stanford, Computer Research, Imaging, Data Analysis

2. Computational Biologist: Word Cloud Generator: Statistical Data, Analysis, Biology, Work, Will, Computational

3. Biostatistician 1: Word Cloud Generator: Data, Senior, Work, Analysis, Duties, Technical, Analytic, Information

4. Junior Consulting Bioinformatician: Word Cloud Generator: Bioinformatics, Analysis, Data, Members, Methods, Researchers

5. Bioinformatician: Word Cloud Generator: Data, Experience, High-Throughput, Bioinformatician, Statistical

6. Data Scientist: Word Cloud Generator: Machine Learning, Data, Financial, Improve, Business, Optimization, Experience

The best job title for me is Data Scientist. I found several types of Data Scientist: Optimization, Statistics, Machine Learning. I am interested in machine learning, so a job doing machine learning will be fun for me. The second type of job title for me is Research Data Analyst. I prefer Research Data Scientist because I like doing research and building pipelines or working on pipelines. The third job title is Bioinformatician. The fourth job title is Computational Biologist. The fifth job title is Biostatistician. Working as a bioinformatician or as a computational biologist could be interesting because I have a degree in Biology. Lastly, I would like to perform statistical algorithms, so a job as a biostatistician could be a nice challenge.
